

We are a certified service disabled veteran, DBE, minority-owned firm specializing in environmentally friendly products and services in the construction, power and petroleum industries. Keymel is committed to distributing stellar, non-toxic products and technologies.

Our products range:

- environmentally-safe release agents
- soil & sediment remediation & mitigation products
- soil stabilizers
- dust control
- vapor intrusion products
- seeds
- EPA approved landscaping products
- Concrete waterproofer/sealants
- geotextile
- grass seeded erosion nets
- heavy-duty filters
- industrial generators
- industrial solar panel systems
- emission scrubbers

Keymel is a large-scale supplier of aggregates: clay, fill dirt, gravel, top soil, limestone, sand, and limestone

In an effort to expand our capabilities and services while maintaining our dedication to an eco-friendly approach, Keymel Technologies has partnered with Web Engineering Incorporated and CETCO Energy Services. Both Web Engineering Inc. and CETCO Energy Services share Keymel Technologies level of commitment to delivering a better product for the environment and meeting the needs of our customers. With over 35 years of expertise in environmental remediation enhances, these partnerships bring greater technologies and services to the industry.

Web Engineering has now become a leading expert:

Project Design and Operations

- Underground/ Aboveground Tank Design, Bulk Fueling Facilities, and Terminals
- Chemical Process and Waste Minimization Designs
- Mechanical and Fluid Control Systems
- Storm Water Management and System Designs
- Solvent Recovery Systems
- Waste Water Treatment Designs

- Oil Blending and Separator System Design and Operation

Soil / Water Assessment, Remediation, and Disposition

- Innovative Clean-up Strategies for a Cost Effective Approach to the Problem
Accenting Bio-Augmentation In-Situ Treatment
- Licensed Site Professional (LSP) Capabilities to Meet All Massachusetts
Contingency Plan Regulatory Requirements
- Groundwater Recovery and Treatment Systems
- Soil Classification and Least Cost Disposal Options
- Brownfields Investigations and Demolition/Construction Oversight

Site Investigations

- For Re-financing and Expansion
- Buying or Selling Property
- Investigating Releases or Threats of Release under EPA and State
Regulations
- Hydrogeologic Studies
- Evaluation and Upgrading of Hazardous Waste Management Strategies

Regulatory Compliance

- Water/Soil/Air Environmental Permitting
- Local Boards/Commissions Presentations and Approval Processes
- Storm water Compliance Issues
-

CETCO's Wastewater Treatment Division provides clay-based chemicals that will remove emulsified oils, heavy metals and suspended solids from water allowing economical disposal or recycling of your industrial waste stream. Offering equipment, clay-based flocculants, liquid coagulants, filtration media and solidification and stabilization agents, CETCO has innovative solutions for the industrial, municipal and oilfield wastewater markets.

Applications:

- Adhesives
- Ceramic slurry
- Circuit board manufacturing
- Synthetic and oil-based coolants
- Die casting
- Dye penetrants
- Floor scrubber and mop water
- Food processing
- Heavy metals removal and finishing

- Landfill leachate
- Potable water treatment
- Paints, inks and dyes
- Parts washers
- Printing
- Corrugated wastewater
- Slaughterhouse water
- Sludge thickening and conditioning
- Steam cleaning
- Power plant wastewater
- Vibratory deburring
- Pressure washer water
- All wastewaters
